3 THINGS TO KNOW BEFORE PURCHASING SCALES:

1. Not all the scales are same. Inferior load cell or chipset will cause a scale unstable and vulnerable. All DIGIWEIGH scales are using first-grade H shape load cells with two-way protection and original 9932 chipsets, which ensures the best performance and durability.
2. Not all the scale companies are same. We really care about our customers. We are taking care of scale services so you don't have to! DIGIWEIGH service center is rated the best service center in scale industry.
3. Not everyone can truly guarantee the BEST PRICE! Bring your proof and we will match or beat the prices of same quality scales.

So be sure to contact DIGIWEIGH before you make the purchase.
